keebo

Warehouse Optimization for Snowflake

Trial Setup Checklist

Thank you for the opportunity to help you save money and time on Snowflake. Once the 2-week free trial is underway, you can expect to see results in as little as 24-48 hours from Keebo's data learning.

Here's how to get started:

❏ Schedule a 30-minute assessment call using this calendar. If you can't find a suitable time, email sales@keebo.ai.

❏ Review the security setup and make sure if we decide to run a trial that someone at your organization can run the various scripts.

❏ Send us any security surveys, vendor setup forms, etc. that you require to sales@keebo.ai.

❏ Gather the names and email address for those who you want to have access to your Keebo Portal. We can add more later as well.

❏ If your Snowflake security requires it, add Keebo's public IP addresses:

    34.123.209.159
    34.71.146.213

❏ Identify which warehouses you would like to optimize. For the trial, we can do as many as 10.

Once the trial begins, we will send a Slack invitation to help us stay connected. Throughout the trial, our team will check in with progress reports and suggestions based on what we learn.

We are eager to get started and look forward to meeting you soon.
